

Drink Fountains

Installation Guide for all types of
Terrain Elements Drink Fountains

**Providing fresh, clean water
to quench public thirst.**

In an urban open space & public use environment, our selection of water fountains offer variety, form & function.

DRINK FOUNTAINS

The Installation of this product must comply with the Australian Plumbing installation Code AS 3500

General

- Every water bollard is fully tested for leaks & function before leaving the factory.
- All plumbing & draining work should be done by a licensed contractor.
- Drainage should be to relevant Authority's approval.
- Water pressure 500 kpa max.
- Water supply should be to relevant Authority's approval.

Water connection

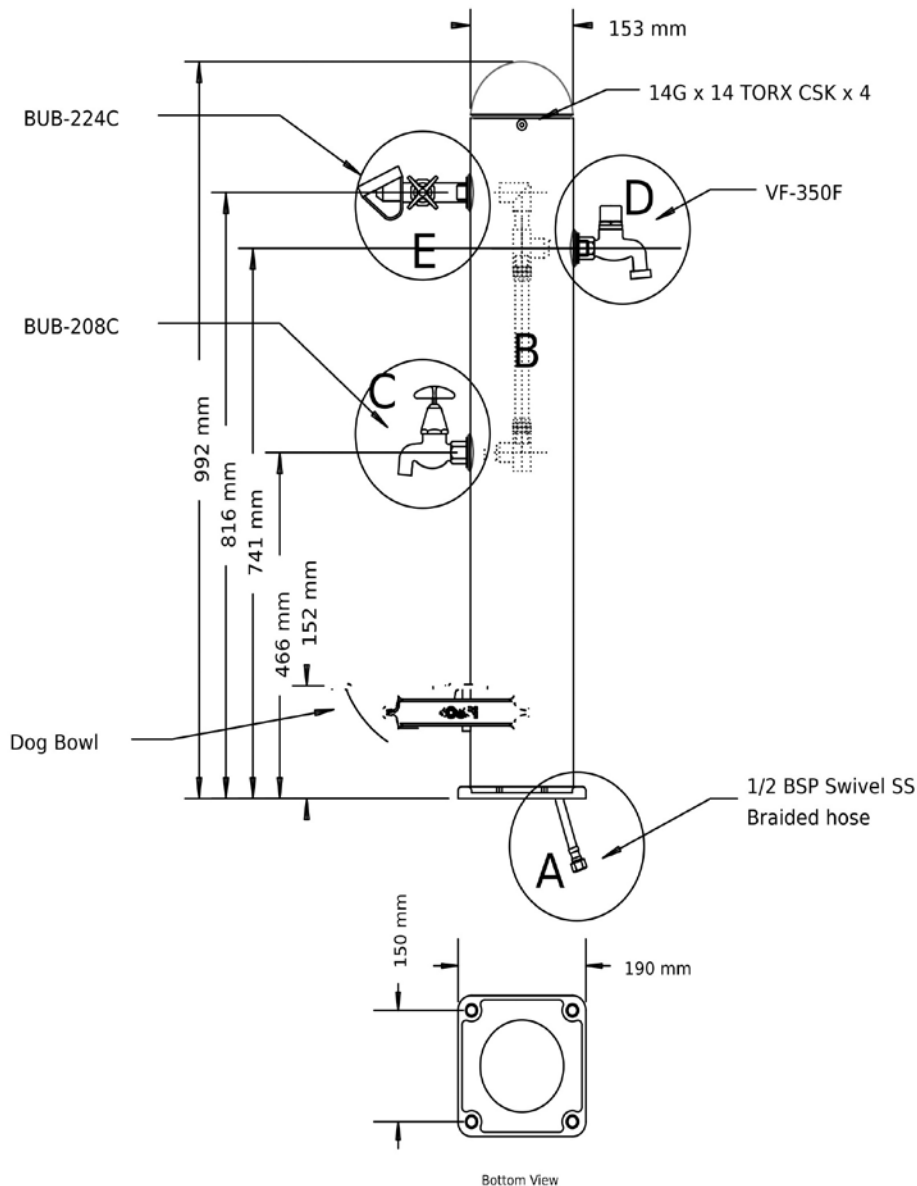

- Use a clean water supply.
- Flush delivery pipe before connecting.
- Fit a 1/2" Y strainer and ball valve.
- Connect flex hose to the water supply.
- Turn on water supply & test for leaks.
- Reposition bollard & tighten fixings.

Suggested fixing

- 10mm x 75mm stainless steel Loxin anchor or dynabolt.

Notes

- All Terrain Elements Drink Fountains provide a 10-year structural warranty.
- Annual servicing is required on all Enware Tapware. Frequency will depend on the frequency of use, water quality & the general environment.
